

Welcome to our September Newsletter!

Dear Reader,

A warm welcome to our September newsletter!

In this edition, we have selected an array of content that showcases our commitment to innovation, quality, and customer satisfaction. Our dedicated team has been hard at work, furthering our mission of providing high quality vibration monitoring products that help businesses to optimize their operations and enhance productivity.

We are thrilled to unveil some exciting additions to our product portfolio. With our latest developments, we aim to address the ever-evolving needs of our customers and equip them with the products required to stay ahead in an increasingly competitive landscape.

Should you have any questions or feedback, please do not hesitate to reach out.

Best Wishes,

Chris Hansford

HS-170 & HS-180S Enhanced Cable Choices

Introducing our HS-170 & HS-180S accelerometers, now available with both PUR and Silicon cable choices. With these new cable choices, customers can experience enhanced durability and flexibility, catering to a wider range of applications. The PUR cable ensures exceptional resistance to abrasion and oil, while the Silicon cable offers excellent temperature resistance, both feature sealing to IP68.

We are commitment to meeting the diverse needs of our valued customers, and these enhanced cable choices are a testament to that belief.

Coming soon: Updated HS-420 Series

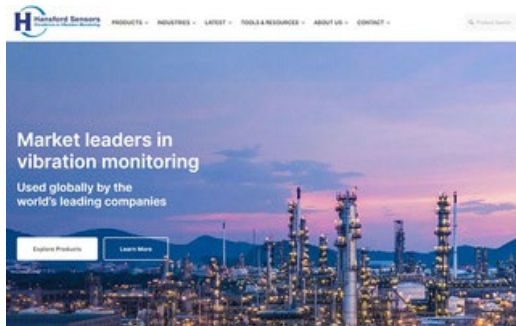

On the 1st of December, we will be introducing the updated HS-420 top exit series, which comes with significant improvements.

The HS-420 will be a lighter weight, making it even more manageable and user-friendly. We've also redesigned the HS-420 to be smaller in size and compact, without compromising on performance. Technical details will remain the same as the current model.

Our aim has always been to deliver top-quality products that exceed our customers' expectations. We believe that the HS-420's improvements will do just that.

New and Improved Website

Our new and improved website is designed to provide you with an enhanced browsing experience. With a fresh look and user-friendly navigation, our new website makes it easier than ever to explore our products and services.

From faster load times to improved search functionality, we're confident that you'll enjoy the benefits of our new website.

Intrinsically Safe Accelerometers: NEPSI Approved

Our HS-150I, HS-170I, and HS-173I intrinsically safe series have recently obtained NEPSI approval. Currently we are in the process of certifying the HS-420 family. This approval for the Chinese market establishes our commitment to providing high-quality and reliable accelerometers for hazardous environments.

Countdown to Silverstone

After two podium finishes at the recent round of racing at Donington Park, Tom is heading into the penultimate round of the BTCC aiming to close the gap with the championship leader.

We are wishing Tom the best of luck as he battles to defend his title. Don't miss the upcoming race at Silverstone circuit on September 24th, and the final round at Brands Hatch on the 8th October! Catch all the action live on ITV4!

Events & Exhibitions for 2023

Over the last few months we have showcased our products, and had the pleasure of meeting our wonderful customers and promising new prospects at a number of exhibitions.

Looking ahead, we are thrilled to announce our participation in the Turbomachinery & Pump Symposium later this month, SMRP Conference in late October and IMC in December. These events will provide us with the chance to explore emerging trends, and display our latest vibration monitoring products.
